

# Medical Portal V2

Eric J. Miller — Multiple Myeloma Medical Portal

Comprehensive health tracking with lab results, treatment timeline, and research news

[medical-site-v2.vercel.app](https://medical-site-v2.vercel.app)

## Original Objective

Build a comprehensive personal medical portal to track **Multiple Myeloma (Smoldering)** diagnosis, treatment with Daratumumab + RVd protocol, lab results over time, symptom logging, and the latest research news. Features animated visualizations explaining drug mechanisms and disease progression.

## Diagnosis Data

### IgG Kappa Monoclonal Gammopathy

|                        |                     |
|------------------------|---------------------|
| CONDITION              | ISS STAGING         |
| Multiple Myeloma (SMM) | Stage I             |
| BASELINE FREE KAPPA    | FISH RESULTS        |
| 137 mg/L               | 1q21 gain, t(11;14) |

# Treatment Protocol

DARATUMUMAB + RVD (INTENSIFIED)

 Daratumumab (Darzalex)

 Revlimid (Lenalidomide)

 Velcade (Bortezomib)

 Dexamethasone

## Pages Built

**Dashboard**  
index.html

**Documents**  
documents.html

**Lab Tracker**  
lab-tracker.html

**Question Checklist**  
question-checklist.html

## Key Features

**Lab Tracking**  
CBC trends, Free Kappa trajectory, eGFR monitoring with Chart.js visualizations

**Timeline**  
Collapsible accordion with treatment milestones, infusion schedule, lab dates

**Site Search**  
Cmd+K keyboard shortcut for instant portal-wide search

**Symptom Log**  
Fatigue, nausea, pain sliders with notes field. localStorage persistence

**Research News**  
Curated myeloma articles from MMRF, ASH, Blood Journal, NEJM

**Progress Trends**  
Week-over-week analysis with projections to Week 16

**What to Expect**

**Future Milestones**

**CSV Export**

Infusion day guide, side effects listed, expected response timeline

Jan 18/25, Feb 1/15, Month 3-4 events mapped out

Export symptom logs for sharing with healthcare providers

Animations & Visualizations

3D DNA Helix

Enhanced depth & rotation animation on canvas showing genetic structure

Phased Drug Mechanism

Approach → Bind → Kill visualization showing Daratumumab action

CHO Cell Bioreactor

Animated cells with antibody physics showing drug production

Interactive Particles

Mouse-responsive background particles for immersive experience

Research News Section

Curated Myeloma Research Articles

- MMRF
- ASH
- Blood Journal
- NEJM
- JCO
- ClinicalTrials.gov

Topics: Clinical trials (Daratumumab, ASCENT), FDA approvals, CAR-T therapy, MRD testing, Genetic risk factors (1q21, TP53)

Tech Stack

- Vanilla HTML
- Vanilla CSS
- Vanilla JavaScript
- Canvas Animations
- Chart.js
- localStorage
- Inter Font

**Design Aesthetic:** Bonhomme Paris-inspired black/white elegance with medical blue accents. No build step

required.

Project Structure

```
medical-site-v2/
├── index.html # Main dashboard + all sections
├── documents.html # PDF library + resources
├── lab-tracker.html # Lab result entry + trends
├── question-checklist.html # Doctor visit prep
├── css/
│   └── styles.css # Global styles
├── js/
│   ├── app.js # Core app logic
│   ├── animations.js # DNA helix, drug mechanism, particles
│   ├── charts.js # Chart.js CBC/Kappa/QoL graphs
│   ├── interactive.js # Accordions, search, news fetch
│   ├── lab-entry.js # Lab result input forms
│   └── symptom-log.js # Symptom logging + export
└── *.pdf # Diagnostic reports, guides
```

Lab Results Tracked

| Date       | Timepoint | Key Metrics          |
|------------|-----------|----------------------|
| 11/07/2025 | Baseline  | Free Kappa: 137 mg/L |
| 12/26/2025 | Day 5     | Post first infusion  |
| 01/02/2026 | Week 2    | Early response check |
| 01/09/2026 | Week 3    | Full CBC + CMP       |

 Feature Audit Results

| Category                        | Implemented | Status |
|---------------------------------|-------------|--------|
| Content Depth & Forward-Looking | 15/15       | 100%   |
| UI/UX Improvements              | 12/12       | 100%   |
| Chart.js Integration            | ✓           | ✓ DONE |
| Collapsible Accordions          | ✓           | ✓ DONE |
| Site Search (Cmd+K)             | ✓           | ✓ DONE |
| Sortable Tables                 | ✓           | ✓ DONE |
| Research News                   | ✓           | ✓ NEW  |
| Deployed to Vercel              | ✓           | ✓ LIVE |

 JavaScript Modules

| Module         | Size    | Purpose                                         |
|----------------|---------|-------------------------------------------------|
| animations.js  | 28.5 KB | DNA helix, drug mechanism, CHO cells, particles |
| lab-entry.js   | 23.2 KB | Lab result input forms and validation           |
| charts.js      | 19.8 KB | Chart.js CBC, Kappa, QoL trajectory graphs      |
| interactive.js | 14.6 KB | Accordions, search, news fetch, sortable tables |

|                |         |                                                  |
|----------------|---------|--------------------------------------------------|
| symptom-log.js | 10.5 KB | Symptom sliders, notes, localStorage, CSV export |
| app.js         | 6.1 KB  | Core app logic, state management                 |
